EDUCATION

Andhra University, Visakhapatnam

2024 - 2026

M.Tech, Computer Science and Technology

GMR Institute of Technology, Vizianagaram

2020 - 2024

B.Tech, Computer Science and Engineering

EXPERIENCE

Backend Developer Intern

Jul 2025 - Present

Social Media Management Tool

- Designed and implemented RESTful APIs using Nest.js for post scheduling, analytics, and content publishing workflows across multiple social platforms.
- Implemented secure media uploads using presigned URLs to Google Cloud Storage (GCP) buckets, keeping large file transfers off the application server.
- Technologies: Next.js, Nest.js, PostgreSQL, Prisma ORM, Google Cloud Storage (GCP), CSS.

PROJECTS

SmartScreen: Automated Multimodal Candidate Screening System

Sep 2025 – Sep 2026

- Designed an automated multimodal candidate screening pipeline combining resume-JD matching (SBERT + skill cascade) with transcript alignment scoring against both the resume and job description.
- Built video-based behavioral analysis (eye-contact estimation, malpractice detection) and a weighted score aggregator with automated, evidence-based email recommendations.
- Technologies: Python, Sentence-Transformers, RapidFuzz, OpenAI Whisper, OpenCV, pdfplumber, python-docx, aiosmtplib.

Real-Time IoT Device Control via X (Twitter) API

Sep 2025 - Oct 2025

- Built an ESP32-based IoT system that controls an LED by parsing real-time tweets from the X (Twitter) API for a specific hashtag.
- Implemented real-time tweet polling with hashtag filtering and JSON parsing to trigger GPIO-based hardware actions on the ESP32.
- Technologies: C++, ESP32, Arduino Framework, X (Twitter) API, ArduinoJson, IoT.

Waste Classification Using Deep Learning

Mar 2025 - Aug 2025

- Deployed a web-based AI application that classifies waste type from a photo using a fine-tuned InceptionV3 model.
- Built a Flask-based interface that returns clear, actionable disposal instructions based on the predicted waste category.
- Technologies: Python, TensorFlow, Keras, InceptionV3, Flask, NumPy.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, C++

Web Development: HTML, CSS, Flask, Next.js, Nest.js

Database Management: SQL, PostgreSQL

Cloud & Tools: Google Cloud Platform (GCP), Git, GitHub, Jupyter Notebook, Prisma ORM, Mastra

ACHIEVEMENTS

- UGC-NET 2025 (Computer Science): Qualified for Ph.D. admission, 90.56 percentile.
- AP PGECET 2024: State Rank 15.
- APEAMCET 2020: Rank 8787.
- JEE MAIN 2020: 85th Percentile.

HOBBIES

Cricket, Listening to Music
